

**WI-FI
SOLUTIONS
ENTERPRISE**

In today's fast-paced digital world, connectivity is a lifeline for many useful online resources. Whether it's a bank, clinic, office, school or restaurant, being disconnected is a major disadvantage at best, and a critical situation at worst.

This is why we created YahClick Wi-Fi Solutions, which ensures that you will never be offline again, even in the remotest of locations.

WHAT IS YAHCLICK WI-FI SOLUTIONS?

An affordable, reliable, satellite-based internet service that provides connectivity to businesses and end users in underserved communities around the world.

HOW DOES IT WORK?

A Wi-Fi hotspot connects via Yahsat's satellite and is managed by a cloud based Wi-Fi platform which enables various levels of user access, monetization and remote AP management.

WHO CAN BENEFIT?

- All the below can benefit immensely from YahClick Wi-Fi's reliable, always-on connectivity:
 - Businesses
 - Hotels
 - Restaurants
 - Banks
 - Schools
 - Clinics
 - Government offices
- People who are under-connected and under-served in remote areas.

KEY BENEFITS

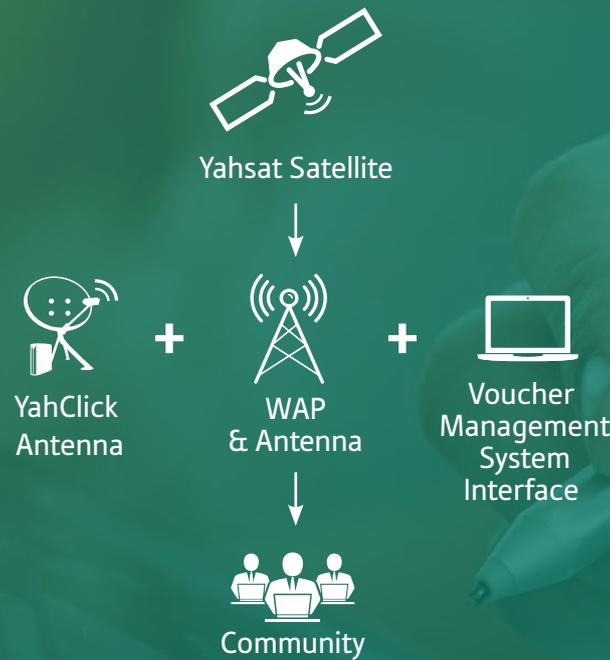

- Fast and easy installation
- Single Cloud Based Management Platform
- Easy monetization of Satellite based internet
- Reliable and Scalable technology
- Fully Managed Access Points
- Online payment integration
- Wifi Advertisement & Marketing Monetization
- Affordable – lower capital and operational costs compared to traditional technology

SNAPSHOT

YAHCLICK WI-FI SOLUTIONS IN ACTION

The YahClick Wi-Fi Solutions along with our solution providers, provides always-on connectivity to remote, unserved communities.

Remote areas may not have the infrastructure to provide reliable and affordable connectivity to people living there. WiFi Access Point (WAP) & YahClick broadband service overcomes this limitation and provides smooth connectivity to all

RELIABLE WI-FI ANYWHERE

LONG RANGE COVERAGE

REMOTE AREAS

Businesses want to set up and monitor their clients' networks, including their free and paid hotspots. The YahClick Wi-Fi management cloud based platform for Wi-Fi management allows businesses to manage access to their Wi-Fi network easily, quickly and remotely.
