

**BOOSTER
SOLUTION**

BACKGROUND

One of the most urgent requests today is for high-capacity, reliable internet, no matter how remote you are. YahClick Booster Solution is designed to provide high-speed internet to ensure that remote entities/businesses can still benefit even if in remote locations, while optimizing users' experience.

YahClick Service Partners have always requested a YahClick certified solution that can multiple x2 YahClick Broadband links to provide aggregated bandwidth, to support bandwidth-intensive applications. YahClick Booster Solution provides the ability to combine two lines into one usage point, doubling your speed via a world-class aggregation tool.

WHAT IS YAHCLICK BOOSTER SOLUTION

YahClick Booster Solution combines bandwidth and throughput from two separate YahClick Broadband links into one single connection, providing speeds up to 40 Mbps downlink and 6 Mbps uplink.

HOW DOES IT WORK?

The solution is offered through Peplink Balance. It has 2 WAN ports that allow two YahClick broadband connections to be connected to the unit to get combined throughput.

A YahClick Service Partner provides and installs a Peplink Balance 20 dual WAN router. This router enables subscribers to combine these service plans at a single point, doubling speed and capacity to ensure that users have internet connectivity within the appropriate network environment.

WHO CAN BENEFIT?

- Enterprise customers benefit from combined YahClick Broadband links throughput to operate bandwidth-intensive applications such as multiple streaming, high-definition security cameras, and to serve large branches sites.
- Remote project sites that have a large number of offices and casual users.
- Remote WiFi connectivity sites that need to serve more customers.
